The right parts in the right
place at the right time

SEE YOU AT THE INTRALOGISTEX SEMINAR SESSION
ON WED 15TH MARCH AT 1PM

Award-winning Agilon is a highly adaptable material management system for warehouses and material management. Agilon can store components measuring up to 60 x 40 x 45 cm in size and 25 kg in weight in their original packaging. Agilon adapts to your needs and deploying a full-service system does not require any changes to premises or major investment.

REDUCE CONSUMPTION AND GENERATE COST SAVINGS

Agilon keeps warehouse balances under control. Agilon identifies every user and automatically keeps a log of every warehouse transaction 24/7. It also enables consumption monitoring based on job numbers, departments and even users. No need for inventory-taking rounds anymore.

SAVE TIME AND RESOURCES WITH AUTOMATED PURCHASING PROCESS

Agilon's precise balance tracking and order point management enable automated purchasing process. Agilon also informs the suppliers when the warehouse balance reaches the order point.

MAKE INTERNAL LOGISTICS MORE EFFICIENT AND FREE YOUR FLOOR SPACE TO MORE PRODUCTIVE USE

Agilon requires little space. It's pipe solution enables the traffic of moving materials to be transferred safely to the ceiling of the plant.

STAY AWARE OF YOUR MATERIAL MANAGEMENT IN REAL-TIME

All your material management data is available in real-time in the Agilon system, wherever and whenever it is needed. Also on mobile.

AGILON CAN BE ADAPTED TO ANY FACILITY WITHIN JUST FEW DAYS

Agilon is a modular solution that can be adapted to your requirements. The complete service package is available for a fixed monthly price.

APPLICATIONS

- Production component warehouse
- Production assembly
- Maintenance warehouse
- Maintenance, repair and operations warehouse
- Internal logistics
- 24/7 trade
