LIFT TRUCKS WITH HEART

A large blue and white Konecranes lift truck is shown in a factory setting. The truck has "KONECRANES" written in red on its side. It has large black tires and a white cab. A person in a blue shirt and dark pants is partially visible on the right side of the frame.

WE MAKE LIFT TRUCKS WITH HEART

We delivered our first heavy-duty lift truck to a special customer in 1959. We put our heart into that first delivery, making the truck with great care and craftsmanship, looking after the delivery and working life of our first-born to make sure that customer was more than pleased.

Our attitude is exactly the same today. We now sell and service our lift trucks all over the world as part of Konecranes, the world's leading provider of smarter lifting solutions. Visit our production facilities and you'll find a close-knit community of Konecranes people with a common passion: making the hardest-working, longest-lived lift trucks in the world. We live and breathe lift trucks.

Meet Stefan (at left) and Lars-Göran (at right), lift truck craftsmen. They're skilled, tough, down-to-earth, hard-working and good-humored, entirely typical of the spirit at Konecranes. They've been making Konecranes lift trucks as a team for ten years.

This publication is for general informational purposes only and we reserve the right at any time to alter the product design and specifications. No statement of this publication shall be construed as a warranty or condition, express or implied, as to any product, its fitness for any particular purpose, merchantability, quality or representation of the terms of any sales agreement.

The heart of our technology

SMARTER WHERE IT MATTERS

We invite you to visit our lift truck factories to see for yourself that your trucks are made with heart — with care, craftsmanship and the latest smart technologies. You can tell a lot about how a lift truck will perform when you visit the facility in which it is made.

The strength, performance and reliability of every Konecranes lift truck is based on three things that make up the heart of our technology:

Strong box-type chassis

Our box-type chassis, lift masts and tilt cylinders are extremely durable. This is the foundation of the long-lasting high performance of our lift trucks.

Efficient load-sensing hydraulics

Our load-sensing hydraulic system is smart, smooth and fuel-efficient. It's based on variable piston pumps that are very efficient thanks to load-sensing flow and pressure valves. The system uses the engine power only as needed at each moment of the lift, based on the load and required lifting speed. The system always provides power-on-demand. If you are driving and not lifting, the system turns off the oil flow. The result is reduced fuel consumption and reduced engine and drive train wear. It also provides a very precise and smooth feel on the lifting levers or joystick.

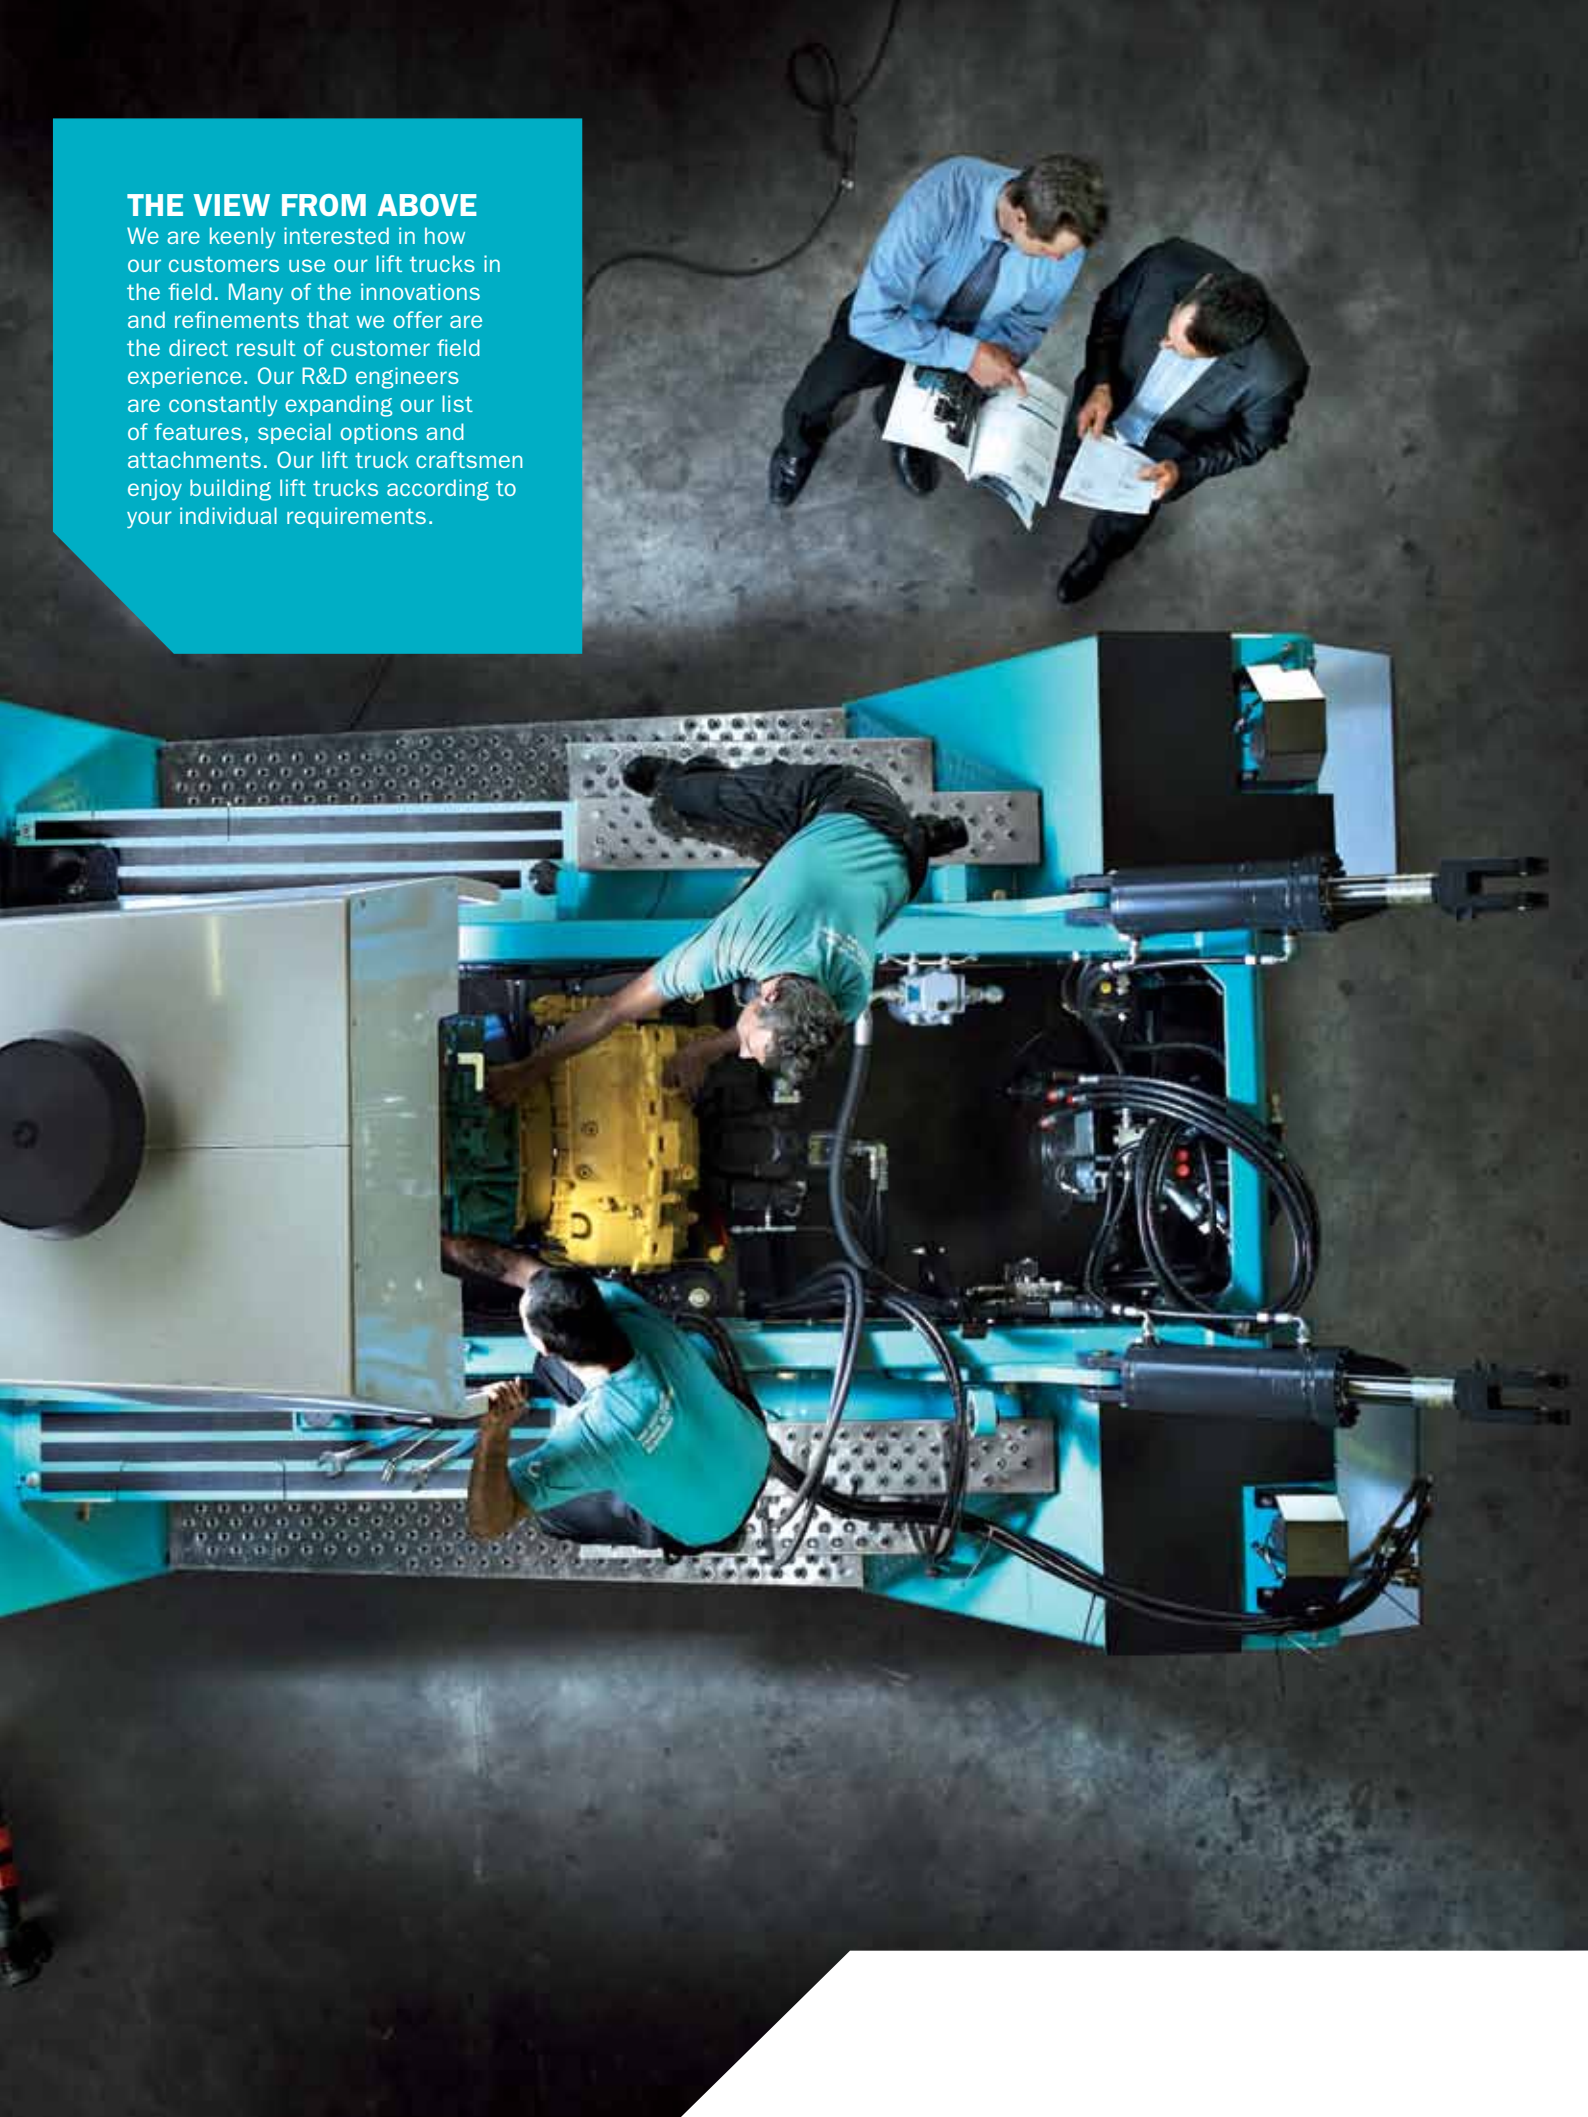

Intelligent Electronic Machine Control

Our Electronic Machine Control system, EMC Master, is the intelligence in every Konecranes lift truck. Its programmable functions give the driver real-time information on truck performance including full monitoring of the engine, transmission, hydraulics, lifting lever/joystick, service intervals and alarms/errors. The system offers some 25 different functions that allow you to tune the truck's performance to your local requirements. You can focus on safety, running costs and productivity. You are in charge.

THE VIEW FROM ABOVE

We are keenly interested in how our customers use our lift trucks in the field. Many of the innovations and refinements that we offer are the direct result of customer field experience. Our R&D engineers are constantly expanding our list of features, special options and attachments. Our lift truck craftsmen enjoy building lift trucks according to your individual requirements.

Making the hardest-working lift trucks in the world

OUR LIFT TRUCKS COME WITH OUR PEOPLE

At the end of every working day, we want to look back at the work we've done with the satisfaction that comes from knowing we'll deliver the best possible lift truck to our customer.

The people who design, build and support Konecranes lift trucks do their work with a special spirit. It comes in part from our long heritage in the lift truck business. We have devoted our working lives to lift trucks — they're in our blood. Many of our fathers have worked in the lift truck business and, in a few cases, even our grand-fathers.

The special spirit also comes from our daily contact with customers. We know that we are only as good as our last lift truck and how that truck will perform throughout its working life.

Lowest Total Cost of Ownership

When you're shopping around the lift truck suppliers and comparing prices, our product will probably not be the cheapest. But don't strike us off your list for that reason. We ask you to consider one thing above all: the importance to your business of the work you need the truck to do, over the long-term. If you let this guide your choice of truck, we will be a very strong contender right to the finish line.

Service and spare parts

Konecranes lift trucks are available in over 80 countries through our appointed distributors and Konecranes country operations. In both cases, they are fully supported with spare parts and personalized service and maintenance. Konecranes has the widest service reach of any company in the lifting business. And our distributors are some of the most respected in the lift truck business.

LIFT TRUCKS FOR EVERY APPLICATION

- Container ports and terminals
- Intermodal and railroads
- Transport and logistics
- Trimodal river handling
- Steel, aluminum and mining
- Concrete, brick and rock
- Wood, pulp and paper
- Automotive
- Heavy and general industry
- Shipyards
- Oil and gas
- Wind power
- Nuclear
- Waste-to-energy

FORK LIFT TRUCKS

10-33 tons
37-65 tons

CONTAINER LIFT TRUCKS

8-10 tons (empty handling)
26-45 tons (laden handling)

REACH STACKERS

10-45 tons (container)
41-45 tons (intermodal)
10-80 tons (industrial)

Wood chip handling, Norway

Steel slab handling, Finland

Aluminum handling, Norway

Twin empty stacker, Germany

Paper roll handling, Finland

Laden top-loader, Saudi Arabia

Rock handling (marble), Italy

THE WORLD'S WIDEST RANGE OF HEAVY-DUTY LIFT TRUCKS

We offer the widest and deepest range of premium lift trucks on the market. You will find the model you need, optimized to your specific requirements for a long, strong and lean service life.

Fork lift trucks, 10 to 18 tons
