

WE MAKE LIFT TRUCKS WITH HEART

We delivered our first heavy-duty lift truck to a special customer in 1959. We put our heart into that first delivery, making the truck with great care and craftsmanship, looking after the delivery and working life of our first-born to make sure that customer was more than pleased.

Our attitude is exactly the same today. We now sell and service our lift trucks all over the world as part of Konecranes, the world's leading provider of smarter lifting solutions. Visit our production facilities and you'll find a close-knit community of Konecranes people with a common passion: making the hardest-working, longest-lived lift trucks in the world. We live and breathe lift trucks.
